

MASHAM NEIGHBOURHOOD PLAN

PUBLIC CONSULTATION QUESTIONNAIRE

COMMENTS

SECTION 3 – BUSINESS AND EMPLOYMENT

QUESTION 18:

Small holder and one holiday let

Electrical Contractor

QUESTION 19:

QUESTION 20:

QUESTION 21:

More houses for local people as 80% of people employed by us do not live in this area.

New supermarket

Greatly increased reception for mobile and broadband communications. A mast perhaps?

Affordable small industrial units.

In general, (this does not specifically relate to only business use) 'broadband' outside of the immediate Masham village/town is very poor. Local areas outside of the immediate area are not provided by any form of fibre or a basic, acceptable 'hard wired' system. Typical operating speeds are limited to '5 maps' - barely enough to receive large email etc. Despite platitudes from service providers the service is atrocious for this day and age.

Internet is very poor, struggle to submit online forms eg tax online & RPA paperwork I feel it is not acceptable still having copper cable in this day and age.

Local housing for employees would help all businesses

protect views of the church and surrounding fields

Whilst the broadband provision is adequate, it could definitely be improved.

I require a clinical space in order to provide my service e.g. a room with a window, hand sink and washable floor. It would be great to be able to rent a space like this on a 'pay as you go', hourly basis

as the nature of my business means i do not work the same hours every week which makes renting a space on a monthly basis quite hard.
